Data Dictionary	5

General Notes

1. ICF tries to copy live data to our test site once per year
 - a. The data you receive from the test site will mimic live with the exception that email addresses will be encased with 'zz' to avoid any communication to the customer.
2. To ensure the privacy of ICF's customers who no longer continue their membership, we are only providing data for active member customers.
 - a. If a customer is a member and does not renew, you will no longer receive updates to their data unless they rejoin.

Authenticate Method

Required call to receive token that is used to call other functions.

TEST API End Point: <https://apps.coachingfederation.org/nficftest/xweb/netForumXML.asmx?op=Authenticate>

LIVE API End Point: <https://apps.coachingfederation.org/xweb/netForumXML.asmx?op=Authenticate>

Example Authenticate Request

```
<?xml version="1.0" encoding="utf-8"?>
<soap:Envelope xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
xmlns:xsd="http://www.w3.org/2001/XMLSchema"
xmlns:soap="http://schemas.xmlsoap.org/soap/envelope/">
  <soap:Body>
    <Authenticate xmlns="http://www.avectra.com/2005/">
      <userName>string</userName>
      <password>string</password>
    </Authenticate>
  </soap:Body>
</soap:Envelope>
```

Example Authenticate Response

```
<?xml version="1.0" encoding="utf-8"?>
<soap:Envelope xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
xmlns:xsd="http://www.w3.org/2001/XMLSchema"
xmlns:soap="http://schemas.xmlsoap.org/soap/envelope/">
  <soap:Header>
    <AuthorizationToken xmlns="http://www.avectra.com/2005/">
      <Token>xyz</Token>
    </AuthorizationToken>
  </soap:Header>
  <soap:Body>
```

Execute Method

TEST API End Point:

<https://apps.coachingfederation.org/nficftest/xweb/secure/netFORUMXML.asmx?op=ExecuteMethod>

LIVE API End Point:

<https://apps.coachingfederation.org/xweb/secure/netFORUMXML.asmx?op=ExecuteMethod>

Example Execute Method Request

```
<soapenv:Envelope xmlns:soapenv="http://schemas.xmlsoap.org/soap/envelope/"
xmlns:ns="http://www.avectra.com/2005/">
  <soapenv:Header>
    <ns:AuthorizationToken>
      <ns:Token>xyz</ns:Token> <!--<token from auth call>--!>
    </ns:AuthorizationToken>
  </soapenv:Header>
  <soapenv:Body>
    <ns:ExecuteMethod>
      <!--<details for the service and web method provided after agreement is signed>--!>
      <ns:serviceName> </ns:serviceName>
      <ns:methodName> </ns:methodName>
      <ns:parameters>
        <!--Zero or more repetitions-->
        <ns:Parameter>
          <ns:Name> </ns:Name>
          <ns:Value>?</ns:Value><!-- key provided for your chapter --!>
        </ns:Parameter>
      </ns:parameters>
    </ns:ExecuteMethod>
  </soapenv:Body>
</soapenv:Envelope>
```

Example Execute Response

****Example is the format for 1 individual: showing the maximum fields available. This method returns ALL active member individuals for the provided chapter (<Individual></Individual> will repeat). Not all customers will have values for all fields. We will not pass NULL values; tags will be omitted if no data exists****

```
<soap:Envelope xmlns:soap="http://schemas.xmlsoap.org/soap/envelope/"
xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"

Data Dictionary

Field List: below you will find a list of all fields that may or may not be returned in your calls along with a description of the data this field gives you.

cst_recno

A number string which is a unique identifier from the ICF Global database, ex 9020884

Member_Status

Character string noting the status of the membership details you are being provided, ex 'Active'

Member_Type

Character string noting what type of membership the customer has, ex 'Coach'

First_Name

Character string noting customer's First Name

Last_Name

Character string noting customer's Last Name

Email

Character string noting customer's primary email address

Phone

Character string noting customer's primary phone number

City, State, Zip & Country

Character string noting customer's City, State (if applicable), Zip Code & country from their primary address

Chapter_Start_Date

Short date formatted MM/DD/YYYY noting customer's affiliation start date with the chapter

MEMBERSHIP DATA

Membership data is sent for the customer's active membership. If the customer does not have an active membership their data will not be sent.

Membership_Join_Date

Short date formatted MM/DD/YYYY noting customer's membership start date with ICF Global

Membership_Expiration_Date

Short date formatted MM/DD/YYYY noting customer's membership expiration date with ICF Global

Rejoin

Character string noting the membership's date of rejoin/reinstatement, if applicable

Auto_Renewal

Character string noting membership's Auto Pay status, noted as Yes/No

CREDENTIAL DATA

Credentialing data is sent for the customer's active credential or if terminated, the most recent credential. If the customer does not have credential data, these fields will be omitted from the response

Flagship_Credential

Character string noting the type of flagship credential the customer holds

Credential_Expire_Date

Short date formatted MM/DD/YYYY noting the credential's valid thru date

Credential_Award_Date

Short date formatted MM/DD/YYYY noting the credential's date of original award (start date)

ACTC_Credential

Character string noting the type of ACTC credential the customer holds

ACTC_Credential_Award_Date

Short date formatted MM/DD/YYYY noting the ACTC's date of original award (start date)

ACTC_Credential_Expire_Date

Short date formatted MM/DD/YYYY noting the ACTC's valid thru date
